# Trust365

Keep Cyber Simple

FIND, FIX, SECURE and INSURE

trust365.com

It all starts with your **Cyber Risk Score**

56

Our Cyber Risk Scoring system identifies, monitors and measures the key threats your business faces every day.

We also factor-in key areas like data loss, i.e., what data has already been leaked and what data has already been compromised.

Find

During this **FIND** phase we are looking at the situation you are in and identify the gaps in your armour. Once we have these, we map this against a sophisticated benchmark of multiple security controls and generate a Cyber Risk Report with the all-important Cyber Risk Score.

FIND, FIX, SECURE and INSURE
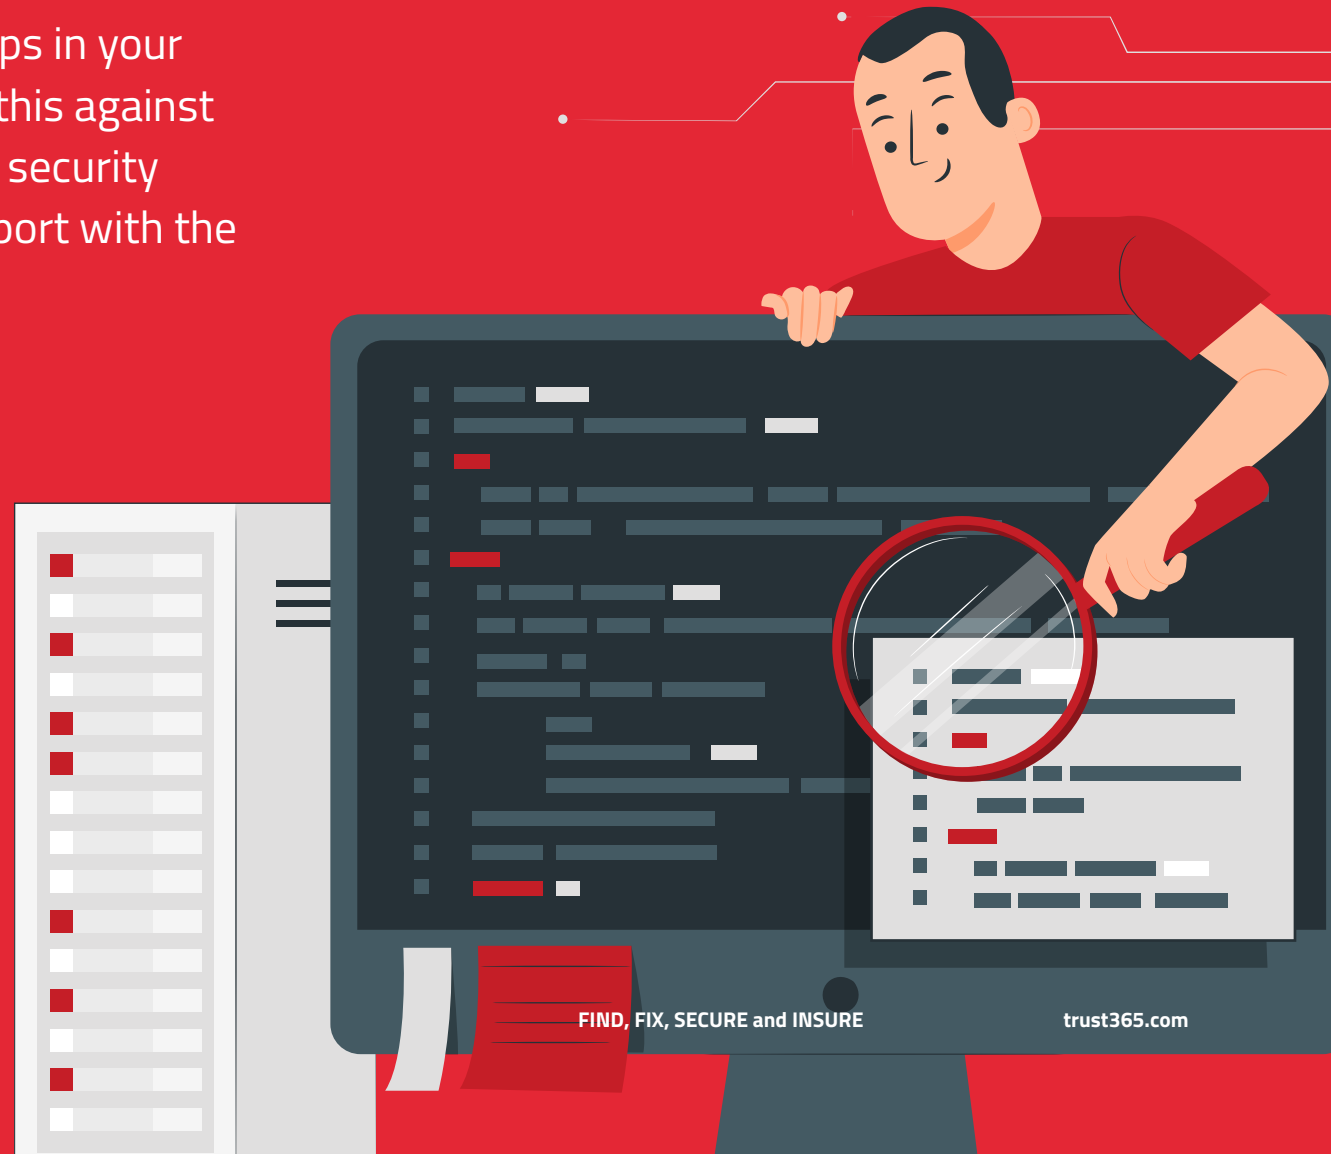

trust365.com

Fix

Once we have established your score, we can then work on generating a plan to **FIX** your security state across many of the threats that your business is exposed to every minute of every day.

55%

CHECKING...
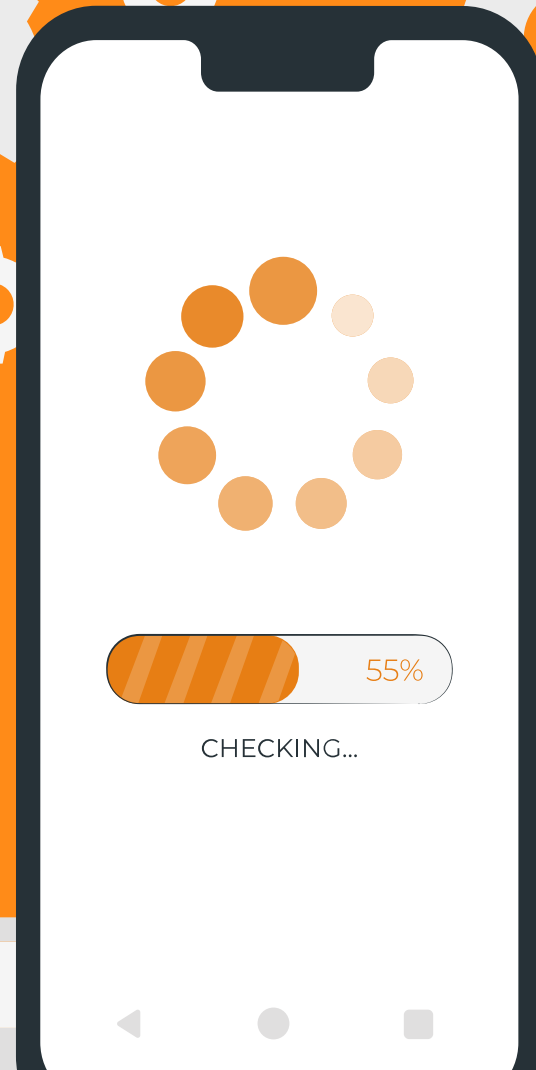

Secure

We then add layers of additional security services designed to protect your organisation's data assets from ransom or theft. This is the **SECURE** phase.

Our key focus is on the where organisations are normally most exposed and **SECURE** them fast. Exposure in these areas typically represents more than 65% of your overall risk:

- ✓ **Email**
- ✓ **Sites**
- ✓ **Devices**
- ✓ **Users**
- ✓ **Apps**
- ✓ **Connections**

We then work on the broader spectrum of cyber risk to fill any remaining gaps in your armour.

Take the Cyber Risk Test

Trust365

1. How may users and devices do we have in use?

2. **How many software packages or services are in use?**

3. Are we patched and secure?

4. **Do we scan and monitor our business for security issues?**

5. Do we have Malware/Ransomware defences in place?

6. **Is my Office 365 secure?**

7. Where do we use WiFi and is it secure?

8. **Do we back-up our data?**

9. Do we have the necessary in-house skills or training in place?

10. **Do we know if our Network is secure?**

11. Have we locked-down what needs to be locked-down?

12. **Do we have access to IT assets managed by privileged access?**

13. Do we have a firewall and DNS security?

14. **Do we monitor and log all IT events?**

15. Do we make sure that no-one can access our systems without permission?

16. **Do we have our Users' credentials centralised, managed, and monitored?**

17. Do we have the right data protection protocols and services in place?

18. **If we had a data breach, do we have an agreed processes in place to recover from it?**

19. If we have most of our security issues covered, do we have resources in place to continually improve our state?

20. **And if so, do we monitor and test our overall cybersecurity state on a regular basis?**

What the customer gets

A compelling DASHBOARD, which tells the user every day what has been found, fixed, and secured. It also offers a GDPR tracker and Risk management toolset, as well as connections to Cyber Awareness Training and other partner resources. Trust365 is a whole-market managed security service with optional Cyber Risk Insurance. Each of the Trust365 services can be purchased individually or as part of the managed security service.

The cost of your Cyber Risk Insurance is included up to 250 seats and is linked to company size for organisations larger than 250 seats.
